SOLUTION OVERVIEW

E-Commerce & Online Checkout

The gateway and the merchant account, from one place.

GUIDED PAYMENTS

Sean Russ
Powered by Priority Business Solutions
Cape Coral, Florida

WHO IT'S FOR

WooCommerce and WordPress stores, donation and membership sites, booking sites, and any client whose checkout you're building or rebuilding.

WHAT IT DOES

- A direct merchant account with underwriting up front, so funds aren't held or accounts closed without warning the way aggregators sometimes do.
- A gateway that plugs into standard WooCommerce and WordPress payment plugins. Sean provides both pieces so the merchant isn't paying two companies.
- Hosted or tokenized checkout fields keep card data off the client's server and PCI scope small.
- Card-on-file and recurring billing for subscriptions, memberships, and dues.

HOW SEAN HANDLES IT

Sean sets up the account and sends gateway credentials to the developer. The developer installs and configures the plugin. Sean coordinates the switch so the site never goes live without a working gateway.

Availability, compatible hardware, integrations, program eligibility, and any software or add-on costs are confirmed in a written quote. No pricing in this sheet on purpose.

SPOT IT

- Any new online store build
- "Just use Stripe / PayPal"
- A Stripe or PayPal account that got shut down or has held funds
- Adding recurring billing or a client portal

SAY THIS

"Before we wire up checkout, want Sean to look at your processing? He provides the gateway and the account together, and we build against whatever he sets you up on."

THEN

Send the contact to Sean the same day, or point the client to **guidedpayments.com/statement-analyzer**. Sean takes it from there.
